Kitchen hazards and food safety
Bendigo, Vic. VEA Australia/New Zealand Pty Ltd, 2015.
1 videodisc (19 min.): sound, colour; 12 cm.
A commercial kitchen can be a fun and highly rewarding place to work, but also one full of potential hazards and dangers. This video is filmed inside the industrial kitchen at Bendigo Health in regional Victoria where thousands of meals and other food requirements are prepared for hospital and associated health services every week. Food Services Manager Damian Martin comprehensively covers a wide range of workplace health and safety areas, taking us through basic kitchen safety in working with hot, sharp and wet equipment and surfaces; and safe and hygienic practices in the storage and handling of food.
Geraldton 363.11964795 KIT
**Safety in food handling**

Bendigo, Vic.: Video Education Australasia, c2003.
1 videodisc (DVD) (26 min.): sd., col.; 1/2 in. + program support notes (8 p.).

The enemy: micro-organisms that cause food poisoning -- Enemy tactics: cross-contamination of food -- Taking action: practising safe food handling.

This program looks at practical steps to keep food safe from contaminants which often cause serious illness. It is especially relevant to those who work in the food service industry, however the principles apply to anyone who handles food on a regular basis.

Hazardous substances risk management

[Perth, W.A.]: WorkSafe Western Australia, c2010.
1 videodisc (DVD) (13 min.): sd., col.; 4 3/4 in.

Hazardous substances are any chemicals or other materials that may put people at risk. They include pesticides, acids, solvents, cleaners, paints, asbestos, wood dust and welding fumes. Hazardous substances are a major workplace hazard and must be safely managed to reduce the risk of injury and disease. It is vital to secure the health and safety of workers by undertaking adequate risk management. This film will show you how to identify hazardous substances, assess the risk of injury or harm, and control the risk.

**Job safety analysis**

Safetycare Australia, [2007-]  
Streaming video

This title is part of Safety Hub available on the library website.
Individual attitudes to workplace health and safety are a significant, but often overlooked, factor in workplace accidents. Leadership in safety is not defined by a role or a job title; it's an attitude that everyone at work can adopt. It means being proactive in controlling risks and always looking out for the safety of oneself and of other. Leadership: being proactive in safety is suitable for personnel at all levels and reinforces the fundamental concepts that are vital to building and maintaining a positive health and safety culture at work. Topics covered in this program: key attitudes to safety; the hierarchy of risk controls; leading by example; the chain of safety leadership; formal processes: where do I fit in?

**Managing the risk of falls at workplaces**

[Perth, W.A.]: WorkSafe Western Australia, c2012.

1 videodisc (DVD) (13 min.): sd., col.; 4 3/4 in.

This film will show you how to identify fall hazards, assess the risks, and implement and maintain controls. Falling from one level to another is a major workplace hazard and is the most common cause of death from traumatic injuries in construction. Fall hazards occur in all industries and most fatalities occur from a relatively low height. It is vital to secure the health and safety of workers by undertaking adequate risk management.

Geraldton 363.117 MAN
Manual tasks risk management

[Perth, W.A.]: WorkSafe Western Australia, c2010.
1 videodisc (DVD) (12 min.): sd., col.; 4 3/4 in.

Manual tasks are activities where a worker has to physically use their body to perform a task. The back, shoulder, hands and knees are the most frequently affected parts of the body and sprains and strains are the most common injury. Some musculoskeletal disorders are caused by strenuous handling or awkward lifts but most injuries are due to wear and tear over a long period of time. Early reporting of problems and issues by workers and prompt action by management is important. It is vital to secure the health and safety of workers by undertaking adequate risk management. So that the day-to-day experiences and knowledge of workers can be utilized, risk management must be done in consultation with the relevant supervisor, the person doing the job and, if there is one, the relevant health and safety representative. This film will show you how to identify hazardous manual tasks, assess risks rising from hazardous manual tasks, and control the risk.

Geraldton 363.116 MAN

Moving and handling in childcare settings

[Bendigo, Vic.]: VEA, [2007]
1 videodisc (DVD) (23 min.): sd., col.; 4 3/4 in.

The childcare environment is both mentally and physically demanding. Keeping children engaged and learning is a great skill, but doing it whilst maintaining your own health and safety is another exceptionally important focus, both as a worker and an individual. In this program, we examine common threats to the physical health of childcare workers, and the strategies that can help avoid it. In particular we empower new and established childcare staff with the know-how to prevent the most common form of harm at work - back injury. We examine the causes of back pain, efficient moving principles, lifting and moving children and equipment, and legal rights and responsibilities.

Shiftwork safety essentials

1 videodisc (18 min.): sd., col.; 4 3/4 in.

15-20 per cent of people in industrialised countries are doing night work, weekend work or other types of shiftwork. If not managed shiftwork can increase the fatigue levels of personnel and increase the risk of serious accidents. However, when managed well, shiftwork can bring about major improvements in productivity and job satisfaction. This training package will ensure personnel learn the steps they can take to reduce the safety risks of fatigue while on the job and decrease the risk of costly lost time incidents.

Emergencies afloat

Venice, Calif: Bennett Marine Video, c2011.  
1 videodisc (DVD) (77 min.): sd., col.; 4 3/4 in.

Emergencies at sea can and do occur when you least expect them. The difference between a manageable emergency and an unmanageable one is usually based on how prepared you are to face the problem. In this program, Captain Steve Larivee takes you on a step-by-step breakdown of some of the most common and uncommon boating emergencies and gives you the tools to competently handle them. Subjects covered include: basic emergency procedure; man overboard rescue; taking on water; flooding; swamping; running aground; capsizing; firefighting; hypothermia; carbon monoxide poisoning; getting rescued; towing vs. salvage

Safety first: OH&S in the office

1 videodisc (DVD) (24 min.): sd., col.; 4 3/4 in.

Many Australians spend a large portion of their working lives in an office. Although most of us wouldn't consider this a workplace of high risk, we must not assume that safety in an office is a given. In this program we'll consider the reasons for conducting work safely, and look at how to implement workplace safety requirements. We'll also talk about participating in the OH&S consultative process and following safety procedures. Occupational health and safety is everybody’s responsibility, not just the employer’s. Employees can and should take a hands-on approach to improving the safety of their workplace.

Geraldton 363.119651 SAF
Understanding safety in the office

East Melbourne, Vic.: Vocam, c2005.
1 DVD (20 min.): sd., col.; 1/2 in. + 1 training guide (44 p.: ill.).

"If you think office work is completely safe, think again. Every year thousands of office workers are involved in incidents and accidents that result in long term injuries. Poor health and safety practices can increase costs and decrease your organisation's productivity. Potential hazards in the office can be avoided by taking simple precautions. Office Safety is essential to your success and the success of your organisation."
