How to locate and edit a Safetyhub video link

The following instructions can also be viewed as an online tutorial here:
https://youtu.be/ZGNPZ-kKkWY

1. Go to the Safetyhub Video collection page:

2. Select your topic, then, on the following page, locate the video you are interested in showing/editing.

3. From the video of your choice, click the MORE INFO button.

4. A box detailing the video will pop-up. At the top of this box, click the EMBED button.

5. A box will now display 3 tabs. The first tab titled VIDEO URL holds the internet link to be copied. Click into the URL field and copy the link. (Click your right-mouse button or use Ctrl + C on your keyboard).
Edit the link to create clips

1. Following from the previous step – Click the third tab titled **EDIT VIDEO**. The editing tool allows up to 6 start and end points.

   ![Start and End Time Fields](image)

   The first step is to watch the video and note start and end times of the section/s of the video you want to use.

2. Back in the **EDIT VIDEO** tab, enter your **start times** in the fields provided paying attention to the minute and seconds fields.

   ![Start and End Time Fields](image)

   You can continue to create more clips by adding further start and end points.

3. Moving down the box, locate the **VIDEO URL** field.

4. **Click** into the **URL field** and **copy** the link to use where needed. When your users click the link you have produced, the video will start at the designated point and finish where you wanted it to.
